

## MyDefence Technology Selected for Australia's LAND 156 Counter-Drone Program

September 4<sup>th</sup>, 2025 – MyDefence announces the selection of its advanced Counter-small Uncrewed Aerial Systems (C-sUAS) technology for Australia's Project LAND 156 Counter-Drone Systems program, in partnership with Precision Technic Defence.

Through Project LAND 156, the Australian Defence Force (ADF) is accelerating the acquisition of state of the art counter-drone technologies for the Australian Defence Force (ADF) to keep Australian's safe and protect military assets. Following testing, Project LND 156 will rapidly introduce a range of the the world's most capable threat detectors and drone-defeating technologies into service by the ADF. As part of the project, MyDefence has partnered with Precision Technic Defence to supply counter technologies that are mission-ready, designed to adapt to evolving threats, and proven to safeguard both personnel and critical assets under demanding conditions.

Through our established partnership, MyDefence and Precision Technic Defence have already delivered integrated solutions to Australian end-users, including wearable drone detection and jamming systems alongside 360° RF-based direction-finding units. The LAND 156 selection marks both a continuation and an expansion of these capabilities.

*"Our product portfolio includes compact, passive, body-worn C-UAS products that provide decisive advantages in the field, from early drone detection to effective disruption, all in a lightweight and soldier-portable form factor" said Jane Ribergaard Fosgrau, Vice President of Sales at MyDefence. "By working closely with Precision Technic Defence, we ensure the Australian Defence Force receive mission-ready solutions that are adaptable to evolving threats and capable of safeguarding both personnel and strategic assets in and outside the Australian borders"*

As MyDefence continues its global expansion, the collaboration with Precision Technic Defence in Australia underscores the company's commitment to delivering mission-critical capabilities, fostering sovereign national resilience, and supporting the modernisation of allied defence forces worldwide.

### About MyDefence

MyDefence is a leading developer and manufacturer of Counter-Unmanned Aircraft Systems (C-UAS), dedicated to securing airspace against malicious drone activity. Built on deep operational experience and engineering excellence, MyDefence technologies are trusted across the globe, including by the United States Army, NATO allied defences and security forces, to protect military personnel, critical infrastructure, and public safety operations.
