Distinctive advantages

- **BATTLE-PROVEN**
Drone detection actively deployed by soldiers at frontlines.
- **EASY TO USE**
Enables soldiers in intense combat to focus on primary tasks.
- **LOW SIZE, WEIGHT AND POWER**
With high performance, minimizes vehicle footprint and power consumption.
- **ATAK-COMPATIBLE**
Enhances operational effectiveness, efficiency, and provides team situational awareness.

Ridgeback

Our Light Vehicle System, Ridgeback, offers a cost-effective and adaptable counter-UAS solution for vehicles with light or no armor. It is designed for flexible integration on a variety of platforms, including LAVs, VIP vehicles, police cars, and civilian vehicles. By combining MyDefence’s wearable RF detector Wingman with ATAK and Wideband XF Antenna featuring magnetic mounts, the Ridgeback delivers reliable drone detection and enhanced situational awareness in dynamic environments.

The Ridgeback system further enhances operational effectiveness by providing versatile protection for both vehicles and dismounted troops. Its rapid deployment capabilities, passive detection for discretion, and seamless integration with ATAK for geolocation and team coordination make it an ideal solution for perimeter security, guard duties, and operations in clandestine environments.

Designed to meet the demands of modern missions, Ridgeback ensures comprehensive counter-UAS protection with minimal operator footprint.

QUICKLY DEPLOYABLE
Deploy in a matter of minutes, for instant drone awareness

PASSIVE DETECTION
Enables operators to remain undetected

DETECT DRONES & CONTROLLERS
For comprehensive awareness of the threat

EXTENSIVE DRONE LIBRARY
Enables accurate classification and low false positives

SOFTWARE FIELD UPGRADES
Enables product evolution without costly hardware upgrades

Specifications

Ridgeback	
Detection Time	< 10s *
Detection Range	Up to 3km / 1.86 mile *
Detection Frequency Bands with Wideband XF Antenna	200 MHz - 6 GHz
Detection Coverage Angle (Horizontal)	Omnidirectional 360°
Operating Temperature	-30°C to 65°C / -22°F to 149°F
UAS Geolocation	Remote-ID Location (With ATAK)
IP Rating	IP67
Color	Black
Vehicle mounting option	Magnetic mount

* Depending on the RF environment & line of sight
